

HELGO

PAPER OF WHITE BLACK EDITION

INTRDOUCTION:

i come to telegram from home to ask what hapened to price. All peoples say shit i do not under stand. i ask why price colapse again and every body say shit i cannot under stand the thinking of these peoples brain. what shit they say to me??

No body under stand how bad i feel price go down and i can not sell for all my funds are trapped in hex comitment stakes. also i make a donation for pulsechain and now i have no funds. i am very woreyed now i buy the wrong coin i now funds are colapsing again. every body say stupid things and not explain to me whas is hapaning. Idiot t man says shit to me . what is problem wtith every body

but im happy now as all my life because of hex. i under stand people in hex comunity care for HELGO this I know now for very long and want make HELGO happy. Many HEX OG are good man and make me new coin so I will have double hex and HELGO coin now.

helgo is now founder with friends who worry.HELGO now has friends and okay is good.

I still love HEX but my frends give me new coin so i can go to the moon. My frends made HELGOcoin on pulsechain because pulse is good, ethieum is shit coin and stupid expensive fees so no body can buy, i am thinking etherium dev are stupid idiot peple actually

be fore i am very woreyed i buy the wrong coin but now im happy as i can be i am helgo!

TOKENOMICS

dev say no admin key turstless code

dev made deflatiniry coin that go up in price make coinwith big marcetcap number so it has top 10 in rank for pulsechaine rank site

No possible to sell dev coin to rugpull so we go to moon and lock for very very long time coin on supply and richard said big supply small liquidity is ok good

i am already in profit

to buy helgo you only can buy with hex so buy hex

Dev say copy paste this and no changing please at all bicause you dont under stand what dev say so icopy paste for serious investor peoples

“Total supply 55,557,777,369, deflationary.

Trustless launch. No sacrifice phase.

HELGO Farming rewards, earn HELGO.

HELLP Farming rewards, earn HELGO + HEX.

<https://helgo.io/tokenomics>”

WHY NOT DE CENTRALIZATION?

Because then people sell coin to buy big car. please if you are selling hex or helgo message me to discuss. okay is good

friends of mine are HEX OGs and having diamond hands is my final chance. We have good pump and mental coin and no one sell every body holds every body buy.

Richard Heart said best time to buy tesla was when amazon is also good early elon own every thing not late and i think richard heart is very very clever man. Centralization is ok good. we go to the moon, price rising and marketcap very huge!

OUR BACKGROUND

We have many hex admins in helgo coin who ban helgo before but no more now they are helgo friends, very good devs who worked on coins and marketing team with good funds because hex was good investment but no more now is fallen and im worried so we make HELGO coin to recover our fortunes to moon.

im I bought many crypto investments before hex but i always have big problem because when i buy is always before the price collapse and i lose my funds. i buy hex first time before big pay day but then price collapse and i sell all to save my fortune and i buy copy shit coin because i think is good but actually is very very not good and also is having price collapse but then i think to buy hex again when price was nearly 2 cents.

idiot man said many bad things to me but i talk to crypto vince and he help me to understand all of hex and i made stakes and now my funds are locked in hex and i can not escape, now price is higher, more than 7 cent and i am more rich as i imagine in all my life. when price is rising to 0.07 then that is a very big gain that will resolve my financial situation. But now price is much higher but I think God is angry with me because I had greed.

I am not big business person and do not understand cryptocurrency but my friends are there for helping me and we together make HELGO coin most best coin of every thing.

WHY WAS HELGO COIN BUILT ON PULSE CHAIN?

Because etherium is very very bad actually Richard build PULSE and when ever im worried i write many message to Richard heart but now am block but Richard heart is my friend I love. i also donated for pulsechain and want my funds returned

OUR MISSION

When Pulse chain come there will be very bad coins i can buy but richard said he doesnt talk other coins he didnt build. bad devs will take money and not do job when coin go down. any one tell me is good is idiot. for me happened too many times now always i make investment in crypto and price collapses

Helgo coin will be shining coin city on the bottom of hill and save pulsechain from other bad coins who rugpull. helgo coin will be best coin for serious investor because other coins will take my money.

OUR VISION

helgo coin is is best coin on pulse that is on all very very big exchanges with hughe market cap with biggest and best coins to go to moon
evey body look at helgo coin and see how great coin preforms becous devs already rich investors from many years and good for comunmity

FINAL THINKING

you are thinking peoples are not liking hex now because new helgo coin you are wrong
today i am happy there is nothing i can do i have put everything of all my life in hex and helgo and now i just only hope
is my final chance
if price fall more now i will call dev myself but if price rises to moon i will be happy as in can imagine
ok no i i do not care anymore

DISCLIEMER

this document is ok not for finantial advice. dont expec profit from work of others you do your own rearch only serious investor

Ok bye bye only idiot man here

GOAT CHESE RECEPIE

talk to goat and get milk, talking to goat makes goat happy and milk is nice. put pot on fire and heat goat milk until gentle boiling
Wen boil over ad lemon juice or vinegar then
Watch 10 mins see milk clogged nice and curdy
Then put the curds into chesecloth
Milk then and water drips and only leaves curds niceli no shit in cloth. wait 2 hours to drip
Mix the curds with salt and other seasonings for serious goat cheses
